English

Amharic

About Me

Passionate Fullstack Developer with hands-on experience in building modern, responsive, and scalable web and mobile applications. Skilled in Flutter for cross-platform mobile development and React/Node.js for fullstack web solutions. I enjoy turning ideas into clean, efficient code and love solving real-world problems with technology

WORK EXPERIENCE

- 🔧 Hackathon Hospitality competition 2025
- Role: Fullstack Developer
- Tech Used: React, Node.js, MongoDB, Flutter
- What I Did:
- Built a decentralized voting app within 48 hours using Flutter (frontend) and Node.js (backend).
- Integrated secure authentication and real-time vote counting.

Ecommerce Mobile App

Role: Full-stack Developer

Tech Used: Flutter, Express.js, MongoDB

I Built a fully functional eCommerce mobile app with user authentication, cart, order tracking, and admin panel. Designed and implemented RESTful APIs using Express.js and MongoDB.

Integrated wallet functionality and responsive UI using Flutter.
